

MAKDADDY Centrifugal Pumps

Key Benefits -

- Fresh Water - Sea Water - Drilling Mud
- Delivers improved performance, better longevity, and cost savings compared to other centrifugal pumps
- Parts are completely interchangeable with other pumps currently on the market
- Open vane impellers designed to reduce turbulence, eliminate recirculation, lower radial and thrust load while providing a smoother flow of fluid throughout the pump
- Guaranteed performance from a global company

PSI's MAKDADDY Pump with enhanced shaft guards.

Features -

- Ductile iron replaceable casing wear pad
- Fully open impeller
- Grease lubricated premium bearings
- Stainless steel or ceramic coated shaft sleeves
- Single or double mechanical seal options
- Labyrinth bearing seals
- Casing jack bolts for easy removal
- Thicker, stronger concentric casing
- Replaceable stuffing box cover

Sizes and Options -

- Pump series: 118 & 250
- Pump sizes: 1x1.5 to 10x8
- Electric, diesel, and hydraulic power options
- Closed coupled units available
- Horizontal, over/under and vertical skids
- Short pedestal to minimize mounting space (optional)
- Enhanced shaft guards for maximum safety (optional)

MAKDADDY Centrifugal Pumps

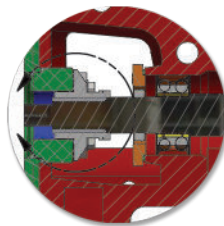

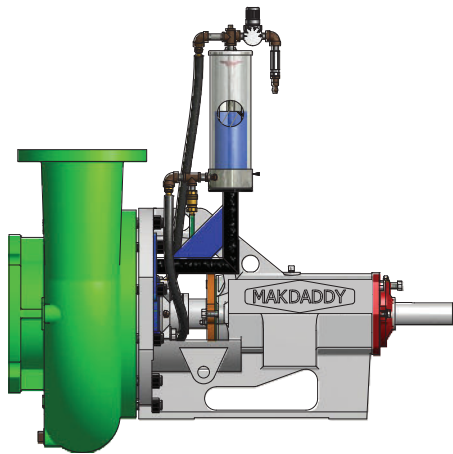

Problem Solving-

Get your fluids in motion with the most reliable pump in the market, PSI's MAKDADDY Centrifugal Pump Line is engineered and designed for the options you need from a company with over 50 years of industry experience. From skids to seals, MAKDADDY has the options.

The MAKDADDY Centrifugal Pump System delivers improved performance, better longevity, and cost savings compared to other centrifugal pumps.

MAKDADDY Double Mechanical Seal:

With the MAKDADDY, strict attention to design details, computerized modeling, quality materials and the use of state of the art manufacturing methods give our pumps and their replacement parts superior durability and performance.

MAKDADDY's ANSI / API Plan 52/53 mechanical seal pot systems for industrial, gas, and oil applications. Provides a protective buffer between the product and the atmosphere, and isolate products being pumped from the atmosphere. As a safety measure, seal pots perform a vital duty protecting the environment and humans from the dangers of hazardous materials.

The MAKDADDY Double Mechanical Seal has been designed for high-performance sealing solutions for the toughest applications. Combine this with cutting-edge manufacturing techniques by PSI, this combination of quality represents the best solution available in the market.
